

**Web Developer, Perl Expert: Vince Veselosky**  
Stone Mountain, GA 30087  
**vince [at] control-escape.com**

## Skill Summary

**Server side expertise:** Apache (1 & 2); Perl, especially mod\_perl (1 & 2); HTML::Mason; MySQL; Linux, Mac OS X; some experience with PHP and Python.

**Client side expertise:** HTML/XHTML, CSS; some experience with JavaScript DHTML/DOM/AJAX, (familiar with Dojo, jQuery, YUI tool kits).

**Tools:** CVS and Subversion, Request Tracker, various Wiki software. Ask.

**Testing Philosophy:** If you can't *prove* it works, then it doesn't.

## Experience

Cox Radio interactive – Atlanta, GA

October 2004 – present: Senior Software Developer

- Lead a team of three developers maintaining a code base of 150k+ lines of Perl.
- Architected and built a customer portal that integrates with radio station automation systems.
- Transitioned large code base from legacy CGI and static files to modern Mod-Perl application servers, adding significant functionality while actually *decreasing* total lines of code.
